

Bentleys Wealth // Growth Plus Portfolio

March 2022 Overview

Bentleys Wealth's model portfolios are a suite of real return, multi-asset class, multi-manager portfolios across four risk/return profiles. The portfolios are actively managed through our dynamic asset allocation and investment manager selection processes.

We dynamically adjust the portfolios' allocations to achieve a high probability of meeting or exceeding the required return objectives while maintaining the stated risk profiles. The mix of asset classes and strategies in the portfolios will vary through time depending on our forward-looking estimates of market risk and return. Our style is active value management with quantitative foundations and qualitative decision-making.

* Returns for periods prior to Dec 2020 are backtested. Returns are net of all investment costs. Returns over more than 1 month are geometrically compounded from monthly data. Returns over periods longer than 12 months are annualised. CPI = RBA Trimmed Mean quarterly data series; CPI + figures shown here include an estimate for the months since the last published quarterly CPI figure. Performance data is an estimate based on information provided to Quilla by Financial Express.

Performance and Rolling Annual Volatility[^]

Bentleys Wealth's portfolios are designed with a focus on minimising the impact of volatility on an investors' assets. In practice, this means the portfolios will have reduced exposure to asset classes where we anticipate risks will outweigh the expected returns. This active management has resulted in consistently lower volatility than an equivalent passively managed index strategy (see chart below).

[^] The above charts include actual portfolio performance data (from December 2020) combined with back tested data prior to this date. The back tested data is based on the portfolio's initial allocation (both weights and managers). This allocation is static over the time period, as we believe that this will serve as an appropriate proxy for the portfolio.

Strategy and Outlook

With inflation still gathering pace across most of the globe, both the US Federal Reserve and the Reserve Bank of Australia are on the cusp of performing a delicate balancing act – tightening rates enough to dampen down inflationary impulses without crushing growth, whilst continuing to ensure their mandate for full employment is achieved.

Risks (either way) are evenly poised now. In such uncertain times, a diversified portfolio offers you the best protection. In the meantime, we are monitoring the volatile situation very closely and will not hesitate to reduce equity allocations in the future if circumstances dictate.
